PRODUCT CHANGE NOTICE

Dear Valued Lantronix Customer,

The purpose of this communication is to inform you of the updated firmware for SecureLinX SLM Management Appliance version 3.4. Beginning May 23th, 2011 SLM will begin shipping with version 3.4. Version 3.4 includes many new features, some highlighted below as well as bug fixes.

| Part Number | Description | Current Revision | New Revision with Firmware V3.4 |
|--------------|---------------------------------|------------------|---------------------------------|
| SLM25612N-02 | SecureLinX Management Appliance | G17 | H18 |

UPDATE HIGHLIGHTS

| Feature/Enhancement | Description and Benefit |
|---------------------------|---|
| Spider Action Page | Issue bulk commands to one or more Spiders simultaneously. Commands include get configuration, get system configuration, restore configuration, push firmware updates |
| Spider Management | Snapshot view of multiple KVM consoles on one page and password management |
| UDS/SDS Action Page | Issue bulk commands to one or more UDS/SDS devices simultaneously |
| Wake-On-LAN | The SLM can send a Wake-On-LAN packet to an Ethernet device |
| NFS v4 | SLM will now support version 4 of NFS. NFS v4 includes performance enhancements, mandates strong security and introduces a stateful protocol |
| IPSec Connections | Support Internet Protocol (IP) Security (sec) protocols to support virtual private networks |
| Automated Save SLM config | Set SLM to automatically save configuration data to local disk or NFS mount. Ability to save and restore configurations to support backup and recovery |

UPDATE AVAILABILITY

Customers with existing SLMs, electing to take advantage of the new features and capabilities of the v3.4 firmware, may upgrade their units at no additional charge. An update patch, installation instructions, updated user guide and release notes will be available on May 2nd 2011 from the Lantronix website at:
