Re: EC 1907/2006 (REACH)

To Whom It May Concern:

As a part of our commitment to a safe and healthy environment, we are continuously working to minimize any adverse impact our product composition may have on the environment. As part of that commitment, we strive to abide by the requirements set forth by REACH (Registration, Evaluation, Authorisation and Restriction of Chemical substances, EC 1907/2006) as such requirements apply to our products. REACH is a European Union regulation on chemicals and their safe use. REACH came into force on June 1, 2007 and its requirements will be phased in over an 11-year period (until 2018). REACH applies to member states of the European Union and members of the European Economic Area.

Among other requirements, REACH mandates the registration of substances in “articles” that may be intentionally released during use. According to Article 7.1 of REACH, registration of substances in “articles” is required by a party if (i) the substances are intended to be released from the article during normal and reasonably foreseeable conditions of use; and (ii) the total amount of the substance present in the articles with intended releases produced and/or imported by the party exceeds one (1) tonne per year per producer or importer..

Lantronix products may be classified under REACH as “articles”. Lantronix products are not designed to intentionally release a chemical or a substance during normal and/or reasonably foreseeable conditions of use. Therefore, no substances contained in Lantronix products require registration with the European Chemicals Agency (ECHA) pursuant to REACH.

Under the terms of REACH, suppliers of articles generally must provide recipients with notification and information on Substances of Very High Concern (SVHC) if those substances are present above a concentration limit of 0.1% weight by weight (w/w). A list of such SVHCs, which are candidate substances for the authorization procedure, is established by the ECHA. Lantronix products have been reviewed for SVHCs at the article-level and the SVHC(s) listed below may be present in the listed articles at levels above the concentration limit of 0.1% w/w.

Substance Name	CAS Number	Article
Boric Acid	10043-35-3, 11113-50-1	MatchPort AR, XPort Direct+
Disodium Tetraborate, Anhydrous	1303-96-4, 1330-43-4, 12179-04-3	MatchPort AR, XPort Direct+
Tetraboron Disodium Heptaoxide, Hydrate	12267-73-1	MatchPort AR, XPort Direct+
Bis (2-Ethylhexyl) Phthalate (DEHP)	117-81-7	460-479 (Mini CD Envelope 3.5"x3.5")

Lantronix will continue to review the SVHC candidate lists that are released by ECHA for additional substances and compliance therewith by Lantronix. Furthermore, with respect to REACH as a whole, Lantronix will continue to evaluate any revisions or amendments to REACH in an effort to ensure continued compliance thereof by Lantronix.

Thank you for your interest in Lantronix and our products. This statement regarding REACH is effective as of the date hereof and shall be subject to the terms, conditions and provisions noted below.

Certain Risks:

1. Even where Lantronix is not subject to direct obligations under REACH, certain of its European Union (EU) or European Economic Area (EEA) customers or business partners may be, depending on their specific operations and practices. This REACH statement does not address all of the REACH considerations that may potentially be relevant or applicable to such parties under their particular circumstances. Furthermore, this REACH statement is in no way intended as advice regarding REACH.
2. This REACH statement is based on current (as of the date hereof) provisions of REACH (as amended) and available ECHA guidance, all of which are subject to change at any time, possibly with retroactive effect. The ECHA, any EU or EEA member or any other regulatory or enforcement authority may disagree with any and all of our assessments contained herein. Because REACH is still new legislation, it is likely to be subject to further revision and/or interpretation and guidance and may be enforced inconsistently within and among the EU and EEA.
