LANTRONIX®

PCN- 095

Product Discontinuation Notice

Dear Valued Lantronix Customer,

The purpose of this communication is to inform you that Lantronix is discontinuing our MSS485-T External Device Server products.

The deadline for placing final non-cancelable, non-returnable purchase orders is **Oct. 15th, 2008** and shipments must be scheduled no later than **Jan. 15th, 2009**, **with availability subject to supply on hand.** The last day of support for this product will be **Jan. 15th, 2010**.

The replacement for the MSS485 line of products is the IntelliBox®-I/O industrial device servers. Powered by Lantronix EventTrak™ technology, this highly-advanced, programmable device server connects your equipment to an IP network and monitors it to watch for events at specified intervals.
When an event occurs, IntelliBox automatically sends pre-determined, user-defined command(s) to the equipment causing it to take appropriate and/or corrective actions – without any user intervention.
IntelliBox can send email notification that the event was detected and handled accordingly.

IntelliBox features:

• Remotely monitor and control RS232 or RS422/485-based equipment
• Remote I/O management using common SCADA or OPC servers with Modbus/TCP protocol
• Modbus TCP to Modbus RTU/ASCII gateway
• SSH/SSL enterprise-grade network security
• Secure remote access and control of digital I/O and relays
• 10/100 Ethernet interface with 1.5kv isolation (802.3 standard)
• Two serial ports (RS232 and RS422/485) with ESD protection and 1.5kv isolation from incoming power
• Two optically-isolated digital I/O

Transition Table:

Existing Part Number	Replacement Part Number	Availability
MSS485-T-01	**IBIO21002-01**	**Shipping**
MSS485-T-02	**IBIO21002-01**	**Shipping**
