# Lantronix PoE Switches
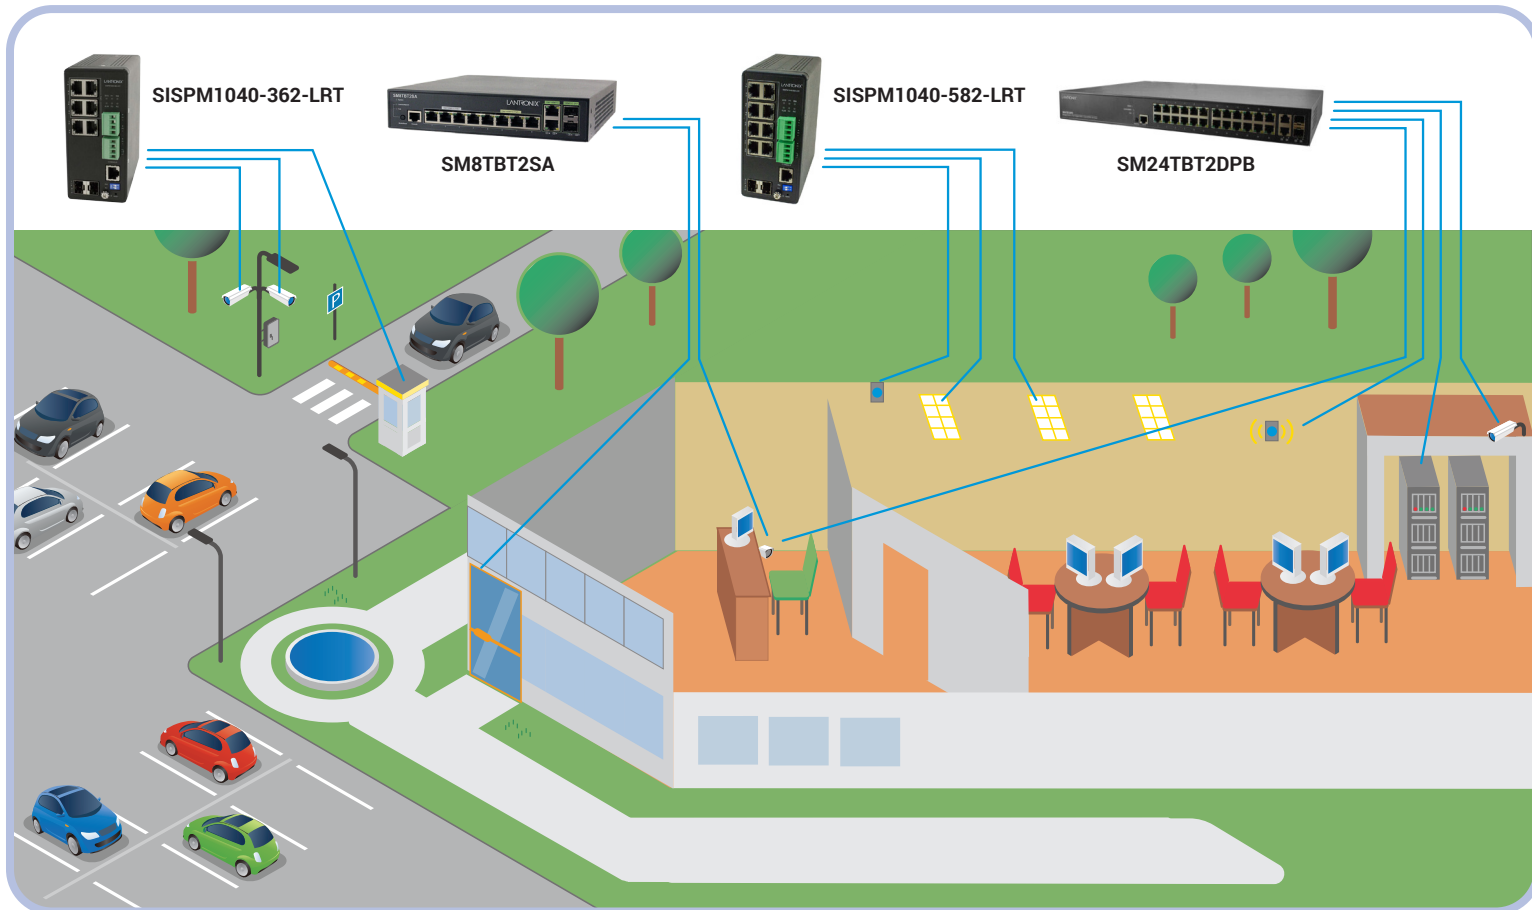

## Who to Engage?

**Integrators and installers of:**

- Cameras and Security Systems
- Access Control Systems
- Intrusion detection systems in Commercial (Indoor/Temp Controlled) or Industrial (Outdoor/harsh) Environments
- Low-voltage (fire and alarm) systems

**People with titles similar to:**

- Director of Security Operations
- Corporate Security Manager
- Security Administrator
- Low-voltage Specialist

## Integrator and Customer Needs

**Features:**

- Automatic Discovery and Construction of Network Topology Map of PoE Switches and Connected Devices
- Interactive maps for managing and documenting installations
- Auto Power Reset Feature Configured on a per Port Basis
- IP and TDR Cable Diagnostics

**Benefit Details:**

- As-Built Network Diagram illustrating the PoE Switches and Attached Devices in PDF document form
- Maps show Port Connectivity, Device Name, IP Address, MAC Address, PoE Power and Bandwidth Used
- Automatic Reset of non-responsive devices to save truck rolls (site visits)
- Built-In IP and Cable connectivity testing to quickly identify problems for Installation and Support

SISPM1040-3166-L3
SISPM1040-3248-L3

## LANTRONIX®

Formerly Transition Networks

## Questions to Ask

Do you need easy installation and configuration of your network PoE switches?

How do you access your remote assets without dispatching your support team to fix?

Do you want to improve your Operational efficiency and cost savings?

## Answers that Win Business

Lantronix Smart Managed PoE switches provide a simplified menu-driven GUI configuration interface and backup and restore duplication of files to be loaded.

Lantronix Layer 2 Smart Managed PoE switches can be accessed remotely via browser or Cloud management in order to monitor, manage assets and diagnose issues without going to sites.

Lantronix Smart Managed PoE switches features provide reliability, visibility and reduced downtime.
