

***NEW* Rolled Serial Adapter (ADP010104)**

Introducing a convenient alternative to the 200.2225 adapter – the ADP010104 rolled serial adapter. With an integrated RJ45 cable, the ADP010104 eliminates the need for an additional Cat5 patch cable between the adapter and the connected equipment.

For use with most Lantronix terminal servers, console servers, the ADP010104 provides a quick and convenient means of connecting with Cisco, Sun (and other) equipment equipped with RJ45 type console (RS-232) ports.

In most applications, the ADP010104 is plugged into console port of the managed device, and standard Cat5 cabling is used to connect to the Lantronix terminal server or console server.

Highlights:

- Convenient alternative to the 200.2225 adapter
- Use with standard Cat5 cable
- For use with ETS P,PS,PR, SCS1600/3200, SCS3205/4805, and SLC models
- Supports most Cisco and Sun equipment (with an RJ45 connection)

Rolled Serial Adapter (ADP010104)
