## PRODUCT CHANGE NOTICE

Dear Valued Lantronix Customer,

The purpose of this document is to notify you of a firmware change to the VDE/200 / Extender5 receive-side USB Personality Module (p/n 200.000.0016-RX).

### Description of Change

The firmware of the VDE/200 / Extender5 receive-side USB Personality Module has recently been updated (to v2.2) as follows:

- USB hubs and active USB extension cables can now be attached between the receive-side Personality Module and desktop peripherals, providing greater system flexibility.

The updated USB Personality Module is compatible with all current and prior transmit-side USB and CAT5 modules, used with VDE/200 equipment and Extender5 units, so there is no need to upgrade other system components.

All receiver-side USB Personality Modules shipped June 2004 and later are equipped with the updated firmware (v2.2). These units are not field upgradeable, and Lantronix does not currently offer a program to return units for upgrade.

### Additional Information

If you have any questions, please contact your sales representative or Lantronix Customer Support at (866) 649-0721 or (949) 453-3990 x342.
