PCN No.: PCN-029

## Product Change Notice

Dear Valued Lantronix Customer,

The purpose of this document is to notify you of a firmware update to our SecureLinx™ SLC Console Managers that adds a number of new features and capabilities. Beginning mid September 2005, the following products will begin shipping with version 3.1 firmware installed.

| Model Number | Description                                     |
|--------------|---|
| SLC          | SLC 8/16/32/48 port, Single or Dual AC; Dual DC |

Version 3.1 includes the following features and enhancements, as well as resolution of a minor security issue in applications where the product is connected to an unsecured network. Upgrade is not required; however, Lantronix recommends end users perform an upgrade.

| Feature/Enhancement   | Description and Benefit  |
|---|--|
| Expanded Device Port control<br>SNMP Private Enterprise MIB | Zero Device Port counters, clear Device Port local log, and terminate all connections associated with a Device Port.   |
| SSH Timeouts  | Timeouts for SSH sessions to the CLI.  |
| Welcome, login, logout and<br>Device Port banners           | Customizable banners have been added for the following; text displayed before the login prompt, text displayed after a successful login, text displayed after logout, and text displayed after establishing a connection to each Device Port.  |
| Connection Details  | The web interface, CLI and SNMP enterprise MIB now display additional information. For connections to a CLI session (via a serial port or network connection), the amount of idle time (time elapsed since the last keystroke) is displayed. For incoming network connections, the source IP Address and Port are displayed. |
| CLI History Command   | The CLI now provides a mechanism for viewing and clearing the command history.   |

An upgrade patch and release notes will be available from the Lantronix web site on August 19, 2005, at the following location: <http://www.lantronix.com/support/downloads.html>.
